UVU Administrative Imperative: Manage Growth

*UVU anticipates and appropriately responds to the region’s higher education needs.*

UVU is anticipating unprecedented enrollment growth throughout the coming years. With significant population increases in population within our service region, it is expected that enrollment will increase to 40,000+ students in 2020, and 46,000+ in 2024.
In what ways will enrollment growth affect academic advising?

Keeping in mind that funding may not increase at the same rate as enrollment growth, what strategies do you recommend to help colleges/schools/departments/advisors adopt to respond to the growth?

What else needs to be understood and considered when it comes to preparing for enrollment growth in regard to advising?
